vented Over the Wires-Ogniniin's Hemo-rable Call for Help-Tricks of the Mine

The man said be would tell me the next day. I never saw him again. Two or three months later a man came in and, showing me that dispatch, asked me if I remembered sending if. I told him I did. 'Can you tell me where the man is who sent it?' he said, I couldn't. Then he went out, and I yelled to him. 'Say, hadn't you better tie a string to yourself? I'm losing you fellows pretty fast,' This led to an explanation, and he told me all about it. It seems the three were brothers. The first one was a little flighty, and was continually running eff to some out-of-the way corner of the globe. Only a few months before he appeared in Newada he had been in India. His brothers paid no attention at first to his crazy telegram, thinking it was only one of his looney jokes, but when several months had passed, and they heard nothing of him, they began to fear that he might have fallen into trouble, and it was decided that one of them should go after him. This was the second gentleman, and his failure to return brought out the third under the apprehension that the others had been foully dealt with. Well, he was gone about a week, and I began to believe that he had gone up the spout, too, when the first one came sneaking into my office and said: Runters.

Several old telegraph-operators met here last night, says a correspondent of the New York Sun, writing from Sidney, Neb., and in the course of a long conversation told some of their experiences on the frontier. One of them began by recalling the great builton robbery at this place. It was at noon, and most of the depot and stage hands had gone across the yards to dinner. As the operator sat in the telegraph-office atone two men presented themselves at his door and demanded admittance. Both had revoivers. He jumped up and let them in, and they quickly bound and gagged him. Believing that Services of the service of the services of the

times, to make out this links: "Ogalalia, Ogalalia, Ogalalia, Help, help." It flashed upon me all at once. The overland train was being robbed, or had been robbed. I grabbed my key, and let every one have it from Cheyenne to Omaha. There was some lively telegraphing there for a time. They sent engines out from two or three points, and got to Ogalalia in time to scare the robbers off. You see I was a good deal further off than a dozen other operators, but somehow I was the first one that caught on. The way that happened was this: The robbers came into the depot at Ogalalia about an hour before train-time, and bound and gagged the operator. After they got him fixed they sat ground and waited. When the train drew up they left him, and he immediately got himself in a position where he could use the key a little. The boys who saw him say it is a mystery how he ever saw him say it is a mystery how he ever did it. His legs were tied twice, and his arms were pinioned behind him, so that it lovellest reflections. she could use the key a little. The boys who saw him say it is a mystery how he ever did it. His legs were tied twice, and has arms were pinioned behind him, so that it was almost impossible to more even the ingers. The fact that I could not catch the consecutive letters until I had heard the message ten or twelve times shows how faint the stroke was. It was the queerest experience of my life."

A third man said he had seen a good deal of service on the border and had had a good many adventures, only one of which ever impressed him much. Down at Grenada, on the Santa Féroad, when it was first opened, he had had a circus all one night with a party of robbers. The country was then a very dangerons one, and the management was in continual fear of desperadors.

"I was in the office in the evening," he said, "getting ready to close up, when four or five hard men came in, They didn't say much at first, but seemed to be looking the ground over. We were always on the lookout for that kind of chaps, and a stem shelme was ticking I pretended that somebody was asking I pretended that somebody was asking me a question. I laughed a little, and seizing the keyl broke these form of. Robbers here." They eved me sharply, but said nothing. The sounder kept up a merry click, and leaned back in the chair. They found a stronger of the said of the sa One of them had the lantern, which he swung vigorously. In going out on the platform they had left the door open, so that I could see things pretty well. I began to hope that the train would stop, for I know it contains platform they had left the door open. I began to hope that the train would stop, for I knew it contained men enough to do up that crowd if not taken too much by surprise. The roar came nearer and nearer, until at last I knew by the sound that they were not going to stop. With the whistle blowing at full blast and the dust flying in clouds, she swept by hke a streak tof lightning. It was all up with me, I thought. The robbers dropped the lantern and began to swear. Then I could bear them talking, and pretty soon I made up my mind that the train had stopped down the road a way, and that they were watching it. Before long they took to their heels, mounted their herses, and were gone. When the trainmen came up to the depot, all armed with Winchesters, I was the only occupant. They released me, and I told them what had happened. A couple of them stayed there with me, and the train went on. If any express ever came any nearer being robbed without going through the mill than that one did, I'd like to know it."

All agreed that it was a close call, but the fourth speaker said he had a better story than any of them. There were no robbers in it. "I was one of the first men who worked a key in Virginta City, as you may know. One night a man came in, picked it where you and locked it, whereupon Taff quietly results for the stores and locked it, whereupon Taff quietly results from the fourth speaker said he had a better story than any of them. OUR LOCAL AFFAIRS. THE DEPUTY MARSHALS.

RICHMOND, VA., FRIDAY MORNING, OCTOBER 31, 1884.

More Facts as to How They are Working Them Here. The following letter shows that these officers of justice," the United States deputy marshals, are being named really by the City Republican Committee, and that they are being recommended to that organization by the Republican judges of election. Judge Atkins's appointees of Republican stripe seem to be pick-ing out the men to be appointed deputy marshals. The deputy marshals cials stopped the voting at the biggest white precinct in Clay Ward; stopped it by arresting the judges and hauling them through the streets down to the United States Commissioner's office in the custom-

One day I was at my desk when the man up at Hooper's siding, ten or twelve miles away, telegraphed down that he was surrounded by redskins, and that they were whetting their tomahawks on the wires. I thought that it was a pretty good joke, until he telegraphed that the station was in flames, and that a lot of the Indians had set out for my place. Then I began to prick up my ears. There were not many of us there just then, and we were in no condition to fight Indians anywar. We threw up breastworks and got everybody who had a gun, a pistol, a club, or a knife, to fall in. It was about sundown when we got all ready for them. While we were "The interposing of gangs of ruffines,"

While we were waiting nervously for the onshaught one of the citizens, a saloon-keeper, came riding up in mad haste and shouted that that there were just 'millions of them coming.' You fellows are all as good as massacred now,' he said. 'There's only just one thing to do, and that is to telegraph up and down the line for help. Put it strong, now,' he said to me. 'Beg, implore, exhort them.' Well, I could rattle a key pretty well in those days, and I everlistingly begged for help. I was thoroughly seared, and I threw my whole soul into the work. After about an hour of agony Cheyenne broke in with, 'Oh, turn yourself out, you big calf! What's the matter with you?' This cooled me off a little, and I looked outside and saw the people going and coming as usual. They had put up a gorgeous joke on me just because I was a telegraphic tenderfoot. My hair fell out soon after that, and it has never grown since.' upon a citizen of this country."

It will require the united effort of every man in this Commonwealth who loves honesty and good government to overthrow these creatures next Tuesday. They have 00,000 negroes who will go to the polls on that day through sunshine or storm. Will you be less faithful to your people and to your country? Come out and vote, white your country? Come out and vote, white men, and bring your neighbors with you, for the loss of Virginia means the defeat of the national Democratic party. It means the defeat of honesty in national affairs. It means new life to Mahoneism—the direct curse that has ever afflicted a people. Again we say come to the polls, for the election of Cleveland and a Democrat to | Songress from your district may depend on your vote.

All fair-minded men must agree with ust that our request is reasonable and right, and backed by the liberal wishes of Judge Hughes, we ask for an equal division of deputy marshals between the parties.

Major Benjamin H. Nash made a similar request of the marshal. Both parties were refused, the marshal stating that it was his purpose to appoint none but those known to be Republicans, and that no inducement could be offered him to do otherwise. Colonel Cary called his attention to the fact that in the city of Richmond the cleetion machinery was in the hands of the Republicans; that two thirds of the judges of election were Republican appointees; that the majority of the Board of Canvassers were Republicans, and that it was true that the Democrats had an indicate the responsibility.

The insufficiency of the gas supply was shown yesterday, the weather being cloudy and dark and requiring that gas should be

Deputy-Marshal Rallard's reply to him was, that he had decided that question as to this district, and his decision had been subtished in the Dispatch. He was then asked for the list of appointments for both districts, which he refused to give, and assigned as a reason that the list was not complete. He was then asked how many would be appointed, and answered, as many as he thought proper to appoint.

Mr. Glennan then stated: In response to the request of Judge Hughes, we are here to present his telegram in relation to the appointment of deputy United States marshals, and to ask that if marshals have been appointed for Norfolk there be an equal division to the two parties. Judge Hughes is clear in opinion as to what ought to be done, and he asks for a division of the deputy marshals between the parties.

The elective representation to both parties under State authority, spoken of by Judges Hughes, has been given. When election officers were appointed for Norfolk Judge Brooke in his appointments mutually satisfied both parties.

sumption is that the Government desires to deal fairly, and that Congress intended to deal fairly between parties, and that the power to appoint deputies would have been better adjusted had the matter been examined into at the proper time.

We ask a division of deputies on the ground of fair play and equity, and on the further ground that we are deeply solicitous for the preservation of peace and order. And we put it on record that we have reason to fear a part of the ignorant voters in Norfolk will be filled with ideas of the attitude of the Government which may result in trouble.

There was no need to finger the trigger; an accidental touch on the hammer would make it fail down from a half-cock.
Saunders declared that he did not have his hand upon the trigger when the discharge took place. He knew that Gentry was there, but did not see him in the direction of the gun.

The jury rendered a verdict that the shooting was accidental. Saunders, who was under arrest, was bailed in \$500 by Justice Isbell for his appearance for examination by the Police Justice.

have issued the following circular to the
trade stating the fact of their being the
selling agents. We could not ask for a
higher endorsement of our goods:

OFFICE OF J. N. HEGEMAN & Co.,
IMPORTERS, WIGLEFALE DRUGGESTS,

In calling the attention of physicians, charmacists, and the public to the purity pharmacists, and the punite to the parity and medicinal qualities of the "Duffy Bar-ley Malt Whiskey," we would state that before we accepted the agency of the goods we were thoroughly convinced by proofs of the highest character of the absolute purity (without even a trace of fusel-oil) of the "Duffy Barley Mait Whiskey," One of the greatest annayance physicians has the "Duffy Barley Mail Whiskey." One
of the greatest anniayances physicians have
in their practice—and a difficulty which
they have not up to this time been able to
overcome—is that of get mg pure whiskey
for the sick-room. The purity and palatableness of this whiskey specially commends
itself to the physician, pharmacist, and the
public. Very respectfully.
October, 1884. J. N. HEGEMAN & Co.
